DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 1, "U.S. Patent Application Serial No. 09/665,899, filed September 20, 2000" has been replaced with --U.S. Patent Application Serial No. 09/665,899, filed September 20, 2000, which issued as U.S. Patent No. 7,138,200 on November 21, 2006--.

Remarks

This Office action is responsive to applicant's amendment filed November 8, 2006.

Claims 20-44 are pending.

Information Disclosure Statement

The Information Disclosure Statement filed on July 9, 2007 and September 12, 2007 has been considered by the examiner with the following exceptions:

1. The English-language translations of the Japanese Office Actions have been lined-through as these documents are not part of the prior art published literature *per se*.

Furthermore, to what extent the cited documents in the Japanese Office Actions may be

Art Unit: 1795

relevant to the present claims cannot be ascertained as the claims considered in the Japanese Office Actions have not been submitted for consideration.

Claim Rejections - 35 USC § 102

The rejection of claims 20-24, 26, 27 and 32-35 under 35 U.S.C. 102(b) based on Dews et al. (U.S. Pat 3,801,374) has been withdrawn.

In withdrawing this ground of rejection, the examiner concedes with applicant's assertion that the separator plate [18] in Dews et al. holds a joint body electrode on one surface thereof but holds a plate [20] on the opposite surface. Thus, the plate [18] does not hold a joint body electrode on a first surface thereof and an adjacent joint body electrode on a second surface thereof opposite to the first surface. The examiner further notes that the plate [18] in Dews has a fuel inlet [28] and fuel outlet [30] for the first surface and a coolant inlet [40] and outlet [42] for the second surface. See col. 2 lines 27-29. Thus, Dews et al. does not teach or suggest the second surface for an adjacent joint body electrode, as the second surface of the separator plate [18] is specifically directed by Dews et al. as having a cooling structure and function.

Double Patenting/Terminal Disclaimer

The provisional rejection of claims 20-28 and 30-43 on the ground of nonstatutory double patenting over claims 11, 12, 14, 20, 22, 24, 26 and 28-35 of copending Application No. 09/665,899 (hereinafter the '899 application) has been withdrawn in view of applicant's filing of a terminal disclaimer.

Art Unit: 1795

The terminal disclaimer filed on September 22, 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Pat. 7,138,200 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 20-43 are allowed.

New claim 44 is allowed. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest the instant invention regarding a separator including both a 1) plurality of regions narrower in a downstream direction and 2) turning passages narrower in a downstream direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
